

Customer information**Explanation of DIN EN ISO 14001:2015**

Dear Sir or Madam,

Minimax GmbH's production has been outsourced to Minimax Technologies GmbH, a wholly-owned subsidiary of Minimax GmbH.

We would like to inform you that our environmental management system according to DIN EN ISO 14001:2015 is valid only for Minimax Technologies GmbH since August 2024.

Minimax Technologies GmbH is a wholly-owned subsidiary of Minimax GmbH, is fully integrated into the corporate structure and is still located at Industriestraße 10-12, 23843 Bad Oldesloe.

The carve-out of the production means that in future we will be able to present a uniform DIN EN ISO 14001:2015 certificate for our production processes.

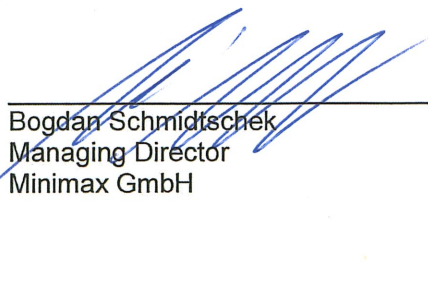

The concentration of certification and production in the new company enables us to make our environmental management systems even more efficient and transparent, without compromising the high quality of our production.

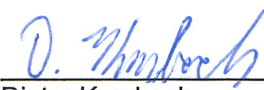

Minimax GmbH will continue to purchase its products exclusively from Minimax Technologies GmbH, ensuring continuity in quality, sustainability and efficiency. Production is carried out in strict compliance with the requirements of ISO 14001 certification, which underlines our responsible use of resources and our commitment to environmental management.

We are constantly striving to improve our environmental impact and keep it as low as possible as part of our environmental management.

Kind regards

Bad Oldesloe,

Bogdan Schmidtschek
Managing Director
Minimax GmbH

Dieter Kurzbach
Quality Management Director
